

# Career Support Agreement

## Career Support

While every effort is made by our team to prepare students for their first job as a junior web developer and to connect them with employers and hiring partners through relationships our staff and faculty have built in the community, the institution does not guarantee employment.

## Student Requirements

In order to qualify for Career Support and be considered as actively looking for employment the Student must comply with the following:

1. The Student must successfully complete the Program.
2. It is important that students continue learning and practicing the web development skills learned in the Program. During the Career Services Period, the Student will actively publish, three (3) to five (5) times a week, new meaningful code to their GitHub repositories.
3. The Student will remain active in their job search after graduation from the Program, submitting no less than five (5) applications per week for opportunities that could reasonably lead to a Qualifying Employment Offer. A Qualifying Employment Offer is defined as an offer of continuous, full-time employment from an employer, for at least 40 hours a week. The job offer must be for a period of at least six (6) months.
4. The Student will provide accurate and honest information on their LinkedIn profile, resume, portfolio, and all job search documents and in their interactions with employers.
5. The Student will communicate all job search activity, through Trello, with the campus operations team and/or Campus Director as directed by the Campus Director.

The Academy at Suncoast Developers Guild encourages you to notify the Campus Director if you perceive any breaches of ethical conduct on the part of employers.

## Opt-In

- ☒ I, the Student, have chosen to **opt-in** for Career Support post-graduation and agree to comply with the above-mentioned requirements to qualify for Career Support through the School.

## Opt-Out

- ☐ I, the Student, have chosen to **opt-out** of receiving Career Support through the School.
